

Somerset County Council Pension Fund

Investment Strategy Statement

1. Introduction

The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016 require administering authorities to formulate and to publish a statement of its investment strategy, in accordance with guidance issued from time to time by the Secretary of State.

The regulations provide a prudential framework, within which administering authorities are responsible for setting their policy on asset allocation, risk and diversity. The Investment Strategy Statement will therefore be an important governance tool for the Somerset Fund as well as providing transparency in relation to how Fund investments are managed.

The Somerset CC Pension Fund's primary purpose is to provide pension benefits for its members. The Fund's investments will be managed to achieve a return that will ensure the solvency of the Fund and provide for members' benefits in a way that achieves long term cost efficiency and effectively manages risk. The Investment Strategy Statement therefore sets out a strategy that is designed to achieve an investment return consistent with the objectives and assumptions set out in the Fund's Funding Strategy Statement.

The Fund aims to be a long term investors, it seeks to invest in productive assets that contribute to economic activity, such as equities, bonds and real assets. The Fund diversifies its investments between a variety of different types of assets in order to manage risk.

The Investment Strategy Statement will set out in more detail:

- The Somerset Fund's assessment of the suitability of particular types of investments, and the balance between asset classes.
- The Somerset Fund's approach to risk and how risks will be measured and managed, consistent with achieving the required investment return.
- The Somerset Fund's approach to pooling and its relationship with the Brunel Pension Partnership.
- The Somerset Fund's policy on how social, environmental or corporate governance considerations are taken into account in its investment strategy, including its stewardship responsibilities as a shareholder and asset owner.

Under the previous regulations the Fund was required to comment on how it complied with the Myners Principles. These were developed following a review of institutional investment by Lord Myners in 2000, and were updated following a review by the National Association of Pension Funds in 2008. While a statement on compliance with the Myners Principles is no longer required by regulation, the Somerset CC Pension Fund considers the Myners Principles to be a standard for Pension Fund investment management. A statement on compliance is included at Annex 1.

This statement will be reviewed by the Pensions Committee at least triennially, or more frequently should any significant change occur.

2. Investment strategy and the process for ensuring suitability of investments

The primary objective of the Fund is to provide pension and lump sum benefits for members on their retirement and/or benefits on death before or after retirement for their dependants, in accordance with LGPS Regulations.

In line with the Fund's Funding Strategy Statement, the committee has set an objective of the fund being at or above a 100% funding level, as calculated by the fund's actuary at the triennial valuation, so that it can meet its current and future liabilities.

In order to meet these overriding objectives the Fund maintains an investment strategy so as to:

- Maximise the returns from investments whilst keeping risk within acceptable levels and ensuring liquidity requirements are at all times met;
- Contribute towards achieving and maintaining a future funding level of 100%;
- Enable employer contribution rates to be kept as stable as possible.

The Fund has the following investment beliefs which help to inform the investment strategy derived from the decision making process.

- Funding, investment strategy and contribution rates are linked.
- The strategic asset allocation is the key factor in determining the risk and return profile of the Fund's investments.
- Investing over the long term provides opportunities to improve returns.
- Diversification across asset classes can help to mitigate against adverse market conditions and assist the Fund to produce a smoother return profile due to returns coming from a range of different sources.
- Managing risk is a multi-dimensional and complex task but the overriding principle is to avoid taking more risk than is necessary to achieve the Fund's objectives.
- Environmental, Social and Governance are important factors for the sustainability of investment returns over the long term. More detail on this is provided in Section 5.
- Value for money from investments is important, not just absolute costs. Asset pooling is expected to help reduce costs over the long-term, whilst providing more choice of investments, and therefore be additive to Fund returns.
- Active management can add value to returns, albeit with higher short-term volatility.

The Pensions Committee annually adopts a target return for the investment funds as a whole. This target return is set with specific reference to the investment return assumed by the actuary as part of the valuation process and therefore explicitly links the Fund's targeted level of return with achieving and maintaining a future funding level of 100%.

In order to translate the above objectives and beliefs into a set of investment mandates for practical management of the investments the Pension Committee have created a customised benchmark for the Fund. The customised benchmark is an amalgamation of specific benchmarks for each investment mandate, which is then given to an investment manager (internal or external) for day to day management.

The customised benchmark sets out the intended long term weighting to various types of investment (or asset classes), such as equities, bonds and property and reflects the Pension Fund’s investment strategy. The customised benchmark seeks to balance the affordability of contributions with the risk of different types of investments.

The Investment strategy and customised benchmark are reviewed by the Pensions Committee annually to ensure they continue to meet the Fund’s investment objectives.

The Actuary considers the Pension Fund’s assets in broad terms – growth assets and stabilising assets. The table below splits the customised benchmark between these categories, along with an overview of the role each asset plays:

Asset Class	Strategic Allocation	Role(s) within the strategy	Geography	Currency
Equities				
Global Passive	23%	Growth Inflation protection	Diversified	Diversified
UK Active	23%	Growth Inflation protection	UK	GBP
US Passive	5%	Growth Inflation protection	US	USD
Europe Active	5%	Growth Inflation protection	Europe ex-UK	Diversified
Japan Active	3%	Growth Inflation protection	Japan	JPY
Far East Active	3%	Growth Inflation protection	Diversified	Diversified
Emerging Market Active	5%	Growth Inflation protection	Diversified	Diversified
Total	67%			
Maximum	100%			

Bonds				
UK Gov't Bonds	4%	Stabilising	UK	GBP
UK Gov't Index linked bonds	4%	Stabilising Inflation protection	UK	GBP
Investment Grade corporate bonds	8%	Stabilising	Diversified	GBP
High yield bonds	3	Stabilising	Diversified	Diversified
Total	19%			
Maximum	100%			
Alternatives				
Property	10%	Growth Inflation protection	UK	GBP
Private equity	3%	Growth	Diversified	Diversified
Total	13%			
Maximum	25%			
Cash				
Cash	1%	Liquidity	UK	GBP
Total	1%			
Maximum	100%			

The Fund's benchmark currently includes a significant holding in 'growth' assets, specifically equities, reflecting its need for higher returns than from government bonds in the long term. These long term returns form part of the Actuary's assumptions and mean that employer contributions can be kept lower.

Actual asset allocation varies over time through the impact of market movements and cash flows. The overall balance is monitored regularly by officers and they have delegated authority to rebalance the assets taking into account market conditions and other relevant factors. The actual asset allocation and the actions taken by officers are reported to the Pensions Committee regularly.

As well as monitoring asset allocation officers also regularly monitor the largest single asset exposures and concentrations to ensure inappropriate exposures do not occur.

As there is a strong internal monitoring mechanism in place it is not deemed necessary to place an upper limit on the exposure of the fund to assets that are readily realisable such as assets listed on a regulated exchange or pooled funds that provide daily dealing. This is reflected in the maximum exposures of 100% quoted in the table above although it is not anticipated that this is likely to occur in anything but the most extreme circumstances. For assets that are illiquid, such as property and private equity funds a limit of 25% of the total value of the fund has been set.

Each manager mandate clearly states what assets can be invested in and where appropriate limits on certain asset types, this is monitored by officers for compliance. The Fund can invest in the following asset types:

- listed stocks, shares and warrants of companies;
- listed government and corporate bonds;
- futures and options;
- spot and forward currency contracts;
- cash deposits with suitable banks and building societies;
- stock-lending arrangements;
- unlisted collective investment schemes such as unit trusts and investment companies;
- limited liability partnerships (LLPs) ; and
- unlisted shares.

3. Risk measurement and management

Successful investment involves taking considered risks, acknowledging that the returns achieved will to a large extent reflect the risks taken. There are short-term risks of loss arising from default by brokers, banks or custodians but the Fund is careful only to deal with reputable counter-parties to minimise any such risk.

Longer-term investment risk includes the absolute risk of reduction in the value of assets through negative returns (which cannot be totally avoided if all major markets fall). It also includes the risk of under-performing the Fund's performance benchmark (relative risk).

Different types of investment have different risk characteristics and have historically yielded different rewards (returns). Equities (company shares) have produced better long-term returns than fixed interest stocks but they are more volatile and have at times produced negative returns for long periods.

In addition to targeting an acceptable overall level of investment risk, the Committee seeks to spread risks across a range of different sources, believing that diversification limits the impact of any single risk. The Committee aims to take on those risks for which a reward, in the form of excess returns, is expected over time.

The key investment risks that the Fund is exposed to are:

- The risk that the Fund's growth assets in particular do not generate the returns expected as part of the funding plan in absolute terms.
- The risk that the Fund's assets do not generate the returns above inflation assumed in the funding plan, i.e. that pay and price inflation are significantly more than anticipated and assets do not keep up.
- That there are insufficient funds to meet liabilities as they fall due.
- That active managers underperform their performance objectives.

At Fund level, these risks are managed through:

- Diversification of investments by individual holding, asset class and by investment managers.
- Explicit mandates governing the activity of investment managers.
- The appointment of an Independent Investment Advisor.

The external investment managers can control relative risk to a large extent by using statistical techniques to forecast how volatile their performance is likely to be compared to the benchmark.

The Fund is also exposed to operational risk; this is mitigated through:

- The use of a Global Custodian for custody of assets.
- Having formal contractual arrangements with investment managers.
- Comprehensive risk disclosures within the Annual Statement of Accounts.
- Internal and external audit arrangements.

The Fund maintains a risk register which is considered by the Pensions Committee regularly and updated as necessary. The risk register considers a number of non-investment risks such as funding risk, employer covenant risk, regulatory risk and operational risks.

The Fund's Funding Strategy Statement specifically covers the risks with respect to Funding and how these are managed by the Fund.

4. Approach to asset pooling

The Somerset Pension Fund is working with nine other administering authorities to pool investment assets through the Brunel Pension Partnership Ltd. (BPP Ltd). This is currently work in progress with the intention of meeting the Government's requirement for the pool to become operational and for the first assets to transition to the pool from April 2018.

Once the Brunel Pension Partnership Ltd. is established the Somerset Pension Fund, through the Pension Committee, will retain the responsibility for setting the detailed Strategic Asset Allocation for the Fund and allocating investment assets to the portfolios provided by BPP Ltd.

The Brunel Pension Partnership Ltd will be a new company which will be wholly owned by the Administering Authorities. The company will seek authorisation from the Financial Conduct Authority (FCA) to act as the operator of an unregulated Collective Investment Scheme. It will be responsible for implementing the detailed Strategic Asset Allocations of the participating funds by investing Funds assets within defined outcome focused investment portfolios. In particular it will research and select the Manager Operated Funds needed to meet the requirements of the detailed Strategic Asset Allocations. These Manager Operated Funds will be operated by professional external investment managers. The Somerset fund will be a client of BPP Ltd and as a client will have the right to expect certain standards and quality of service. A detailed service agreement is being drafted which will set out the duties and responsibilities of BPP Ltd, and the rights of Somerset Fund as a client. It includes a duty of care of BPP to act in its clients' interests.

An Oversight Board will be established. This will be comprised of representatives from each of the Administering Authorities. It will be set up by them according to an agreed constitution and terms of reference. Acting for the Administering Authorities, it will have ultimate responsibility for ensuring that BPP Ltd delivers the services required to achieve investment pooling. It will therefore have a monitoring and oversight function. Subject to its terms of reference it will be able to consider relevant matters on behalf of the Administering Authorities, but will not have delegated powers to take decisions requiring shareholder approval. These will be remitted back to each Administering Authority individually.

The Oversight Board will be supported by the Client Group, comprised primarily of pension investment officers drawn from each of the Administering Authorities but will also draw on Administering Authorities finance and legal officers from time to time. It will have a primary role in reviewing the implementation of pooling by BPP Ltd, and provide a forum for discussing technical and practical matters, confirming priorities, and resolving differences. It will be responsible for providing practical support to enable the Oversight Board to fulfil its monitoring and oversight function.

The proposed arrangements for asset pooling for the Brunel pool have been formulated to meet the requirements of the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016 and Government guidance. Regular reports have been made to Government on progress towards the pooling of investment assets, and the Minister for Local Government has confirmed that the pool should proceed as set out in the proposals made.

Somerset County Council has approved the full business case for the Brunel Pension Partnership. It is anticipated that investment assets will be transitioned across from the Fund's existing investment managers to the portfolios managed by BPP Ltd between April 2018 and March 2020 in accordance with a timetable that will be agreed with BPP Ltd. Until such time as transitions take place, the Fund will continue to maintain the relationship with its current investment managers and oversee their investment performance, working in partnership with BPP Ltd. where appropriate.

Following the completion of the transition plan outlined above (approximately 2020), it is envisaged that all of the Fund's assets except certain cash holdings will be invested through BPP Ltd. However, the Fund has certain commitments to long term illiquid investment funds which will take longer to transition across to the new portfolios to be set up by BPP Ltd. These assets will be managed by the Fund in partnership with BPP Ltd. until such time as they are liquidated, and capital is returned.

5. Social, environmental and corporate governance policy

The Fund has a fiduciary duty to seek to obtain the best financial return that it can for its members. This is a fundamental principle, and all other considerations are secondary. However, the Fund is also mindful of its responsibilities as a long term shareholder, and the Pensions Committee regularly considers the extent to which it wishes to take into account social, environmental or ethical issues in its investment policies. The Fund's policy is to support engagement with companies to effect change, rather than disinvestment.

In the light of that overarching approach the following principles have been adopted:

- The Fund seeks to be a long term responsible investor. The Fund believes that in the long term it will generate better financial returns by investing in companies and assets that demonstrate they contribute to the long term sustainable success of the global economy and society.
- Social, environmental and ethical concerns will not inhibit the delivery of the Fund's investment strategy and will not impose any restrictions on the type, nature of companies/assets held within the portfolios that the Fund invests in. For example, the Fund will not require any form of dis-investment from fossil fuels, tobacco or such like.
- It is recognised, however, that the interests of investors on social etc. grounds may coincide with those solely on investment grounds in which case there will be no conflict of interest. Indeed, the Committee believes that in the long run, socially responsible and fiduciary investment will tend to come together since adverse performance on social, environmental or ethical issues will ultimately be reflected in share prices.
- The Fund will seek to engage (through the Brunel Pension Partnership, its asset managers or other resources) with companies to ensure they can deliver sustainable financial returns over the long-term as part of comprehensive risk analysis. In the example of fossil fuels, this will mean engaging with oil companies on how they are assessing their business strategy and capital expenditure plans to adapt to changes in cost base and regulation that will ensure the continued delivery of shareholder returns in the medium to long term. Engagement with companies is more likely to be successful if the Fund continues to be a shareholder.
- Although social, environmental and ethical issues rarely arise on the agendas of company Annual General Meetings, where an issue does arise the Council's investment managers will vote in accordance with the Fund's interest on investment grounds.
- The Fund recognises the risks associated with social, environmental and governance (ESG) issues, and the potential impact on the financial returns if those risks are not managed effectively. The Fund therefore expects its investment managers to monitor and manage the associated risks. As the Fund moves towards the new arrangements for the pooling of investments it will work with its partners in the Brunel pool and the Brunel Pension Partnership Limited company to ensure that robust systems are in place for monitoring ESG risk, both at a portfolio and a total fund level, and that the associated risks are effectively managed.

6. Policy of the exercise of rights (including voting rights) attaching to investments

The Fund recognises its responsibility as an institutional investor to support and encourage good corporate-governance practices in the companies it invests in. The committee considers that good corporate governance can contribute to business health and success by encouraging boards, shareholders and other stakeholders to answer to each other. Good corporate governance also plays an important part in encouraging corporate responsibility to shareholders, employees and wider society.

The Fund is fully supportive of the UK Stewardship Code, published in July 2010, and the Pensions Committee accepts the rights and responsibilities that attach to being a shareholder and will play an active role in overseeing the management of the companies in which it invests. The Fund is a signatory to the Code and a copy of the Funds most recent Stewardship Statement can be found within the Fund's annual report on the SCC website: <http://www.somerset.gov.uk/information-and-statistics/financial-information/budgets-and-accounts/>

The Funds policy on the exercise of voting rights is:

- To vote on all resolutions at company meetings where the fund holds shares in UK companies and where practically possible for shares in overseas companies.
- To give external investment managers the power to vote on our behalf in line with their own process and policy, which we review, within industry standards and the principles of this statement.
- For the in-house managed funds, to receive external advice from a specialist organisation on voting issues and to follow their recommendations in voting on all resolutions where practically possible. This service is currently provided PIRC Ltd.

External investment managers are required to report on their voting activity as part of their standard quarterly reporting. A summary of the Fund's voting activity is reported to the Pensions Committee twice a year.

The Fund's voting rights are an asset and will be used to further the long-term interests of the Fund's objectives. As a general principle, votes will be used to:

- Protect shareholder rights.
- Reduce, as far as possible, risk to companies from corporate governance failing.
- Improve long-term value.
- Encourage corporate social responsibility.

As part of the Brunel Pension Partnership (BPP) we are actively exploring opportunities to enhance our stewardship activities. More information is on the BPP website: <https://www.brunelpensionpartnership.org/>

7. Advice taken

This Investment Strategy Statement has been put together by Somerset County Council's professional investment officers, supported by the Fund's Independent Investment Advisor.

The Fund has committed to pooling investments through the Brunel Pension Partnership Limited (BPP Ltd.), and advice from the Brunel Client Officer Group project team has also been taken into account in shaping the Fund's response to the pooling initiative and building an investment strategy that can be implemented via BPP Ltd. once it becomes operational.

The Brunel Client Officer Group has provided support with regard to the impact on strategy of the investment pooling proposals. The group comprises the investment officers from the Avon Pension Fund (Bath and NE Somerset Council), Buckinghamshire CC, Cornwall Council, Devon CC, Dorset CC, Gloucestershire CC, Oxfordshire CC, Somerset CC, Wiltshire Council and the Environment Agency.

8. Arrangements for reviewing this statement

The guidance requires that the Investment Strategy Statement should be revised at least every three years, and when any significant changes are made to the Fund's investment strategy.

This Investment Strategy Statement will be regularly reviewed by the pensions committee, particularly to ensure it continues to meet all regulatory and statutory requirements. Where there is significant change to the Statement the pensions committee will consult relevant stakeholders, particularly the Pension Board, prior to amending the policy.

**Approved by the Pensions Committee
Somerset County Council Pension Fund
June 2017**

Annex 1

Working in line with Myners

In 2000, the UK Government ordered a review of institutional investment in the UK. The review was carried out by Paul Myners, the chairman of a large fund-management group, and his findings were published in March 2001.

Myners sets out a number of principles of best practice and recommends that pension funds should set out what they are doing to apply these principles. In response to Myners' proposals, the Government issued a set of 10 investment principles in October 2001 that it said it would be taking forward. In November 2008, the Government published a revised set of principles, following on from this CIPFA had produced a set of Myner's principles specifically for Local Government Pension Schemes and guidance on how to compare compliance with the principles. The fund's performance against the CIPFA principles and guidance is set out below.

Principle 1: Effective Decision Making

Administering authority should ensure that:

- **decisions are taken by people or organisations with the skills, knowledge, advice and resources necessary to make them effectively and monitor their implementations; and**
- **those persons or organisations have sufficient expertise to be able to evaluate and challenge the advice they receive, and manage conflicts of interest.**

The fund is fully compliant with this principle but must continue to work to ensure that the knowledge base of officers and committee members remains comprehensive and current.

Principle 2: Clear Objectives

An overall investment objective(s) should be set out for the fund that takes account of the scheme's liabilities, the potential impact on local tax payers, the strength of the covenant for non-local authority employers, and the attitude to risk of both the administering authority and scheme employers, and these should be communicated to advisors and investment managers.

The fund is fully compliant with this principle. The fund will look to make additional progress by further consideration of the needs of the disparate employers within the fund and how their differing needs are reflected in the objectives of the fund as a whole.

Principle 3: Risk and Liabilities

In setting and reviewing their investment strategy, administering authorities should take account of the form and structure of the liabilities.

These include the implications for local tax payers, the strength of the covenant for participating employers, the risk of their default and longevity risk.

The fund is fully compliant with this principle.

Principle 4: Performance Assessment

Arrangements should be in place for the formal measurement of performance of the investments, investment managers and advisors.

Administering authorities should also periodically make a formal assessment of their own effectiveness as a decision making body and report on this to scheme members.

The fund is fully compliant with this principle with respect of measurement of investment performance and investment managers. The fund needs to consider more formal arrangements for the measurement of performance of other advisors and particularly formal assessment of the pensions committee's performance.

Principle 5: Responsible Ownership

Administering authorities should:

- **adopt, or ensure their investment managers adopt, the Institutional Shareholders' Committee Statement of Principles on the responsibilities of shareholder and agents**
- **include a statement of their policy on responsible ownership in the statement of investment principles**
- **report periodically to scheme members on the discharge of such responsibilities.**

The fund is fully compliant with this principle.

Principle 6: Transparency and Reporting

Administering authorities should:

- **act in a transparent manner, communicated with stakeholders on issues relating to their management of investment, its governance and risks, including performance against stated objectives**
- **provide regular communication to scheme members in the form they consider most appropriate.**

The fund is fully compliant with this principle.
