

APPENDIX B – BIBLIOGRAPHY

In the preparation of the Joint Structure Plan from conception to 'adoption', numerous publications were consulted or produced. These documents had varying degrees of influence on the contents of the final version of the adopted plan. The key documents and sources of information that were frequently used in the process and are cited in the text of the Explanatory Memorandum are listed below. Two main criteria have determined what items have been included;

- only documents and sources that have been placed in the public domain through formal publication either in paper or electronic format, and,
- where documents were updated or superseded during the course of the preparation of the Joint Structure Plan, only the later version is cited.
